Who is Allah?

Allah is our Lord.

There is no god but Allah.

Allah has no partners or children.

He is the creator of everything.

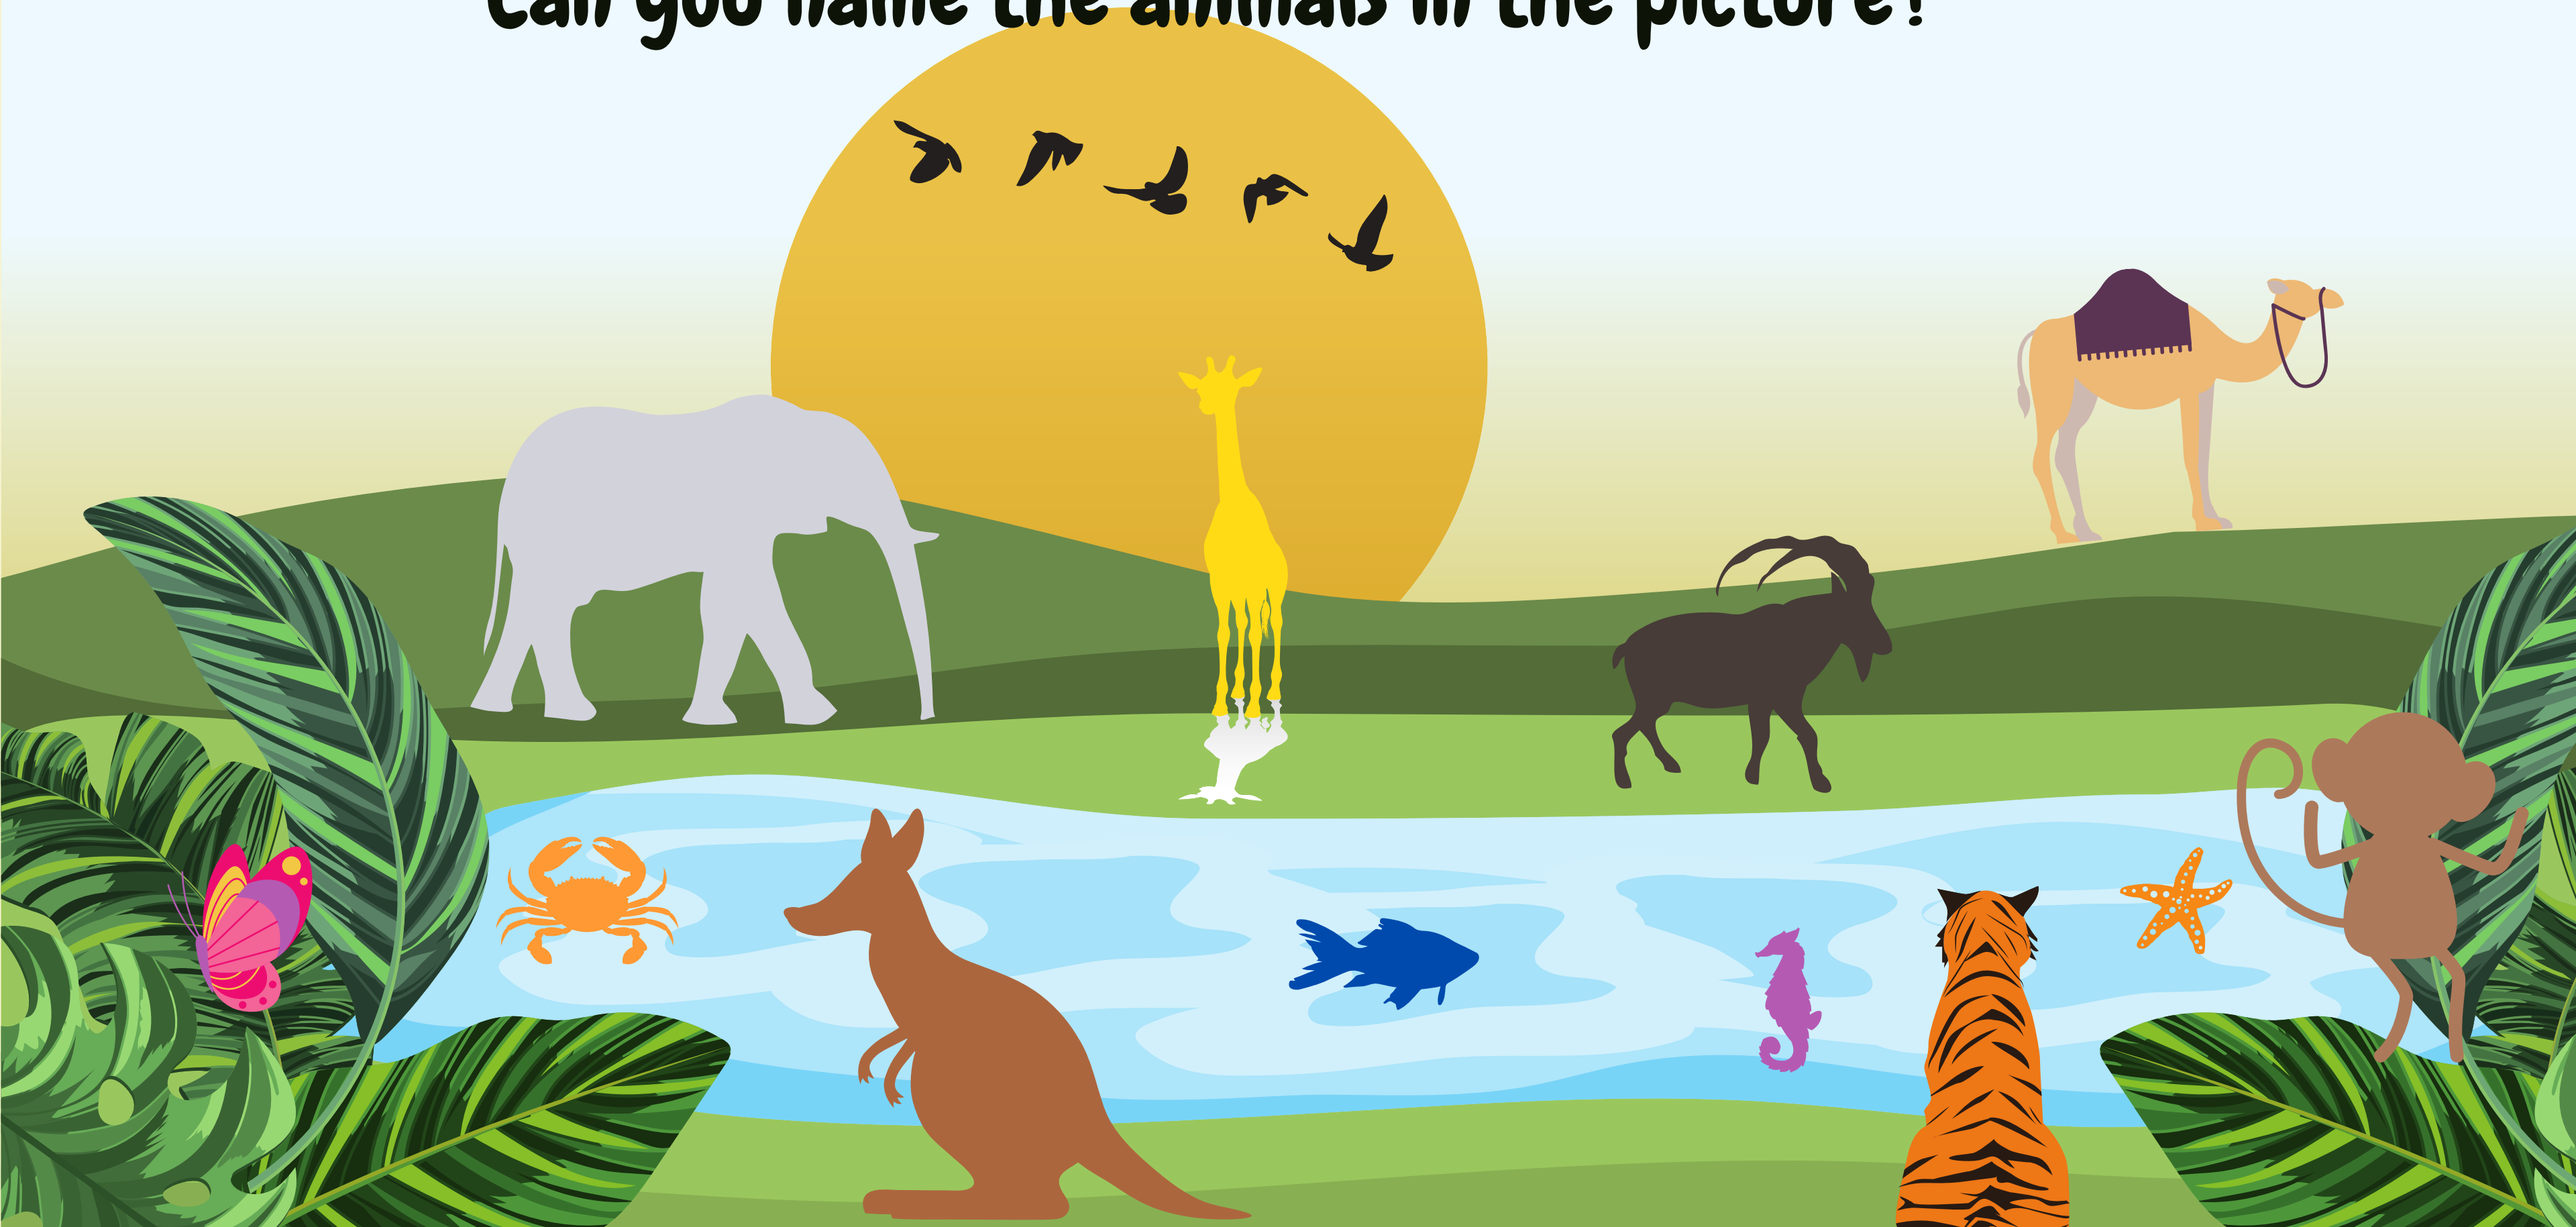

Allah created the whole universe*.

*The Universe is everything we can touch, feel, sense, measure or detect. It includes living things, planets, stars, galaxies, dust clouds, light, and even time.

He created the sky, sun, moon, rivers and trees.
Can you see any other examples of Allah's creation in the pictures?

**He created all the creatures on the earth.
Can you name the animals in the picture?**

Allah created us and our families,

the friends we play with,

the hearts we love with,

and the brains we use to think.

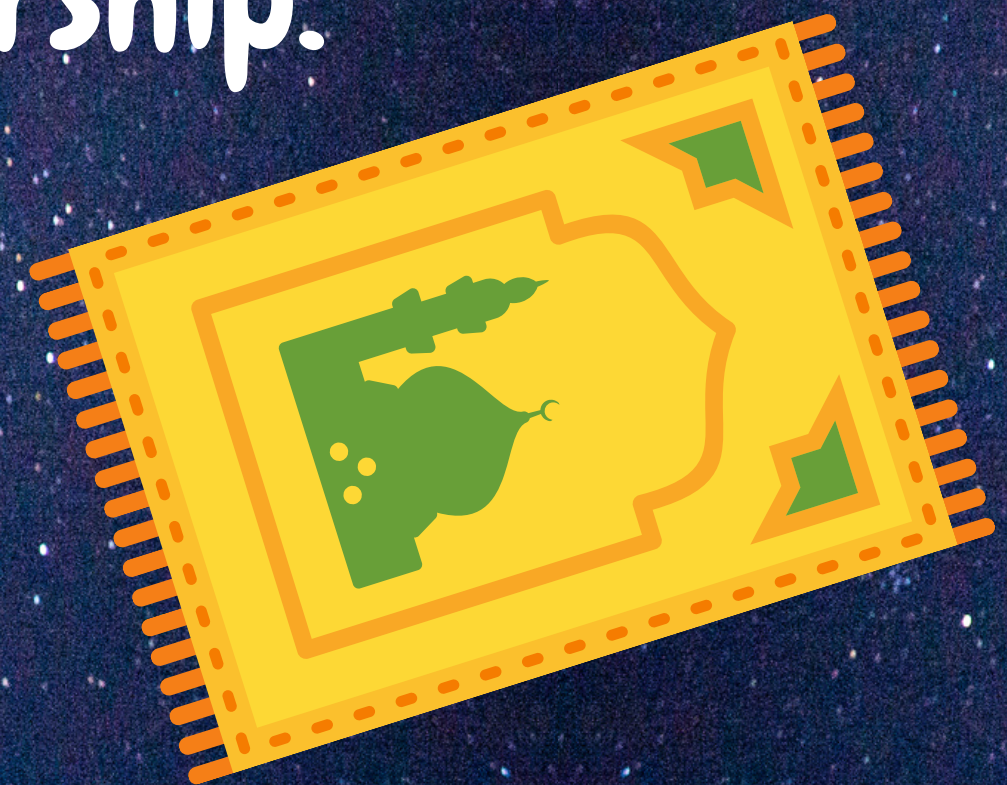

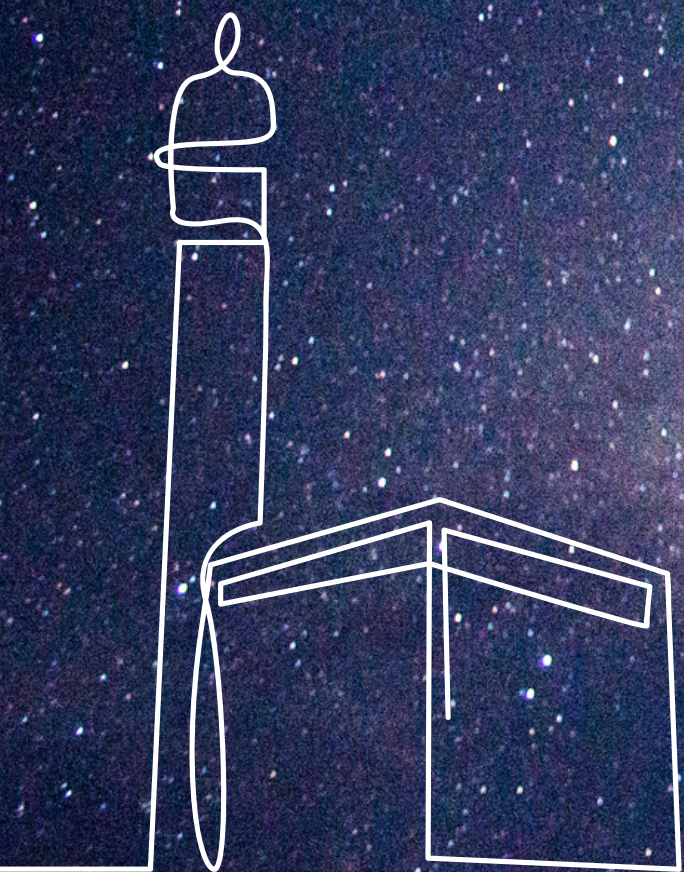

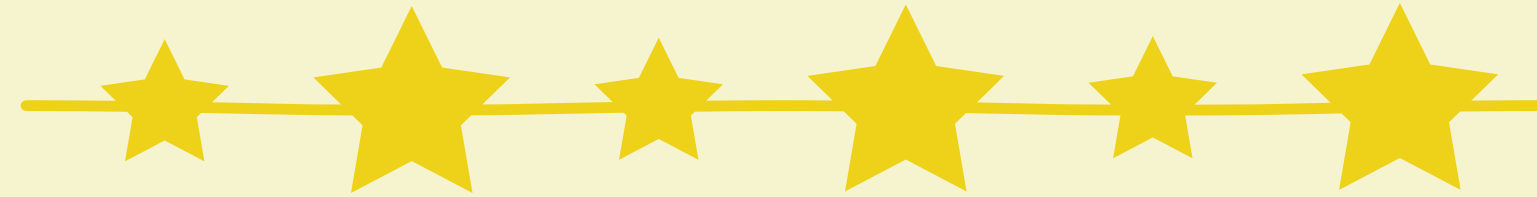

الله

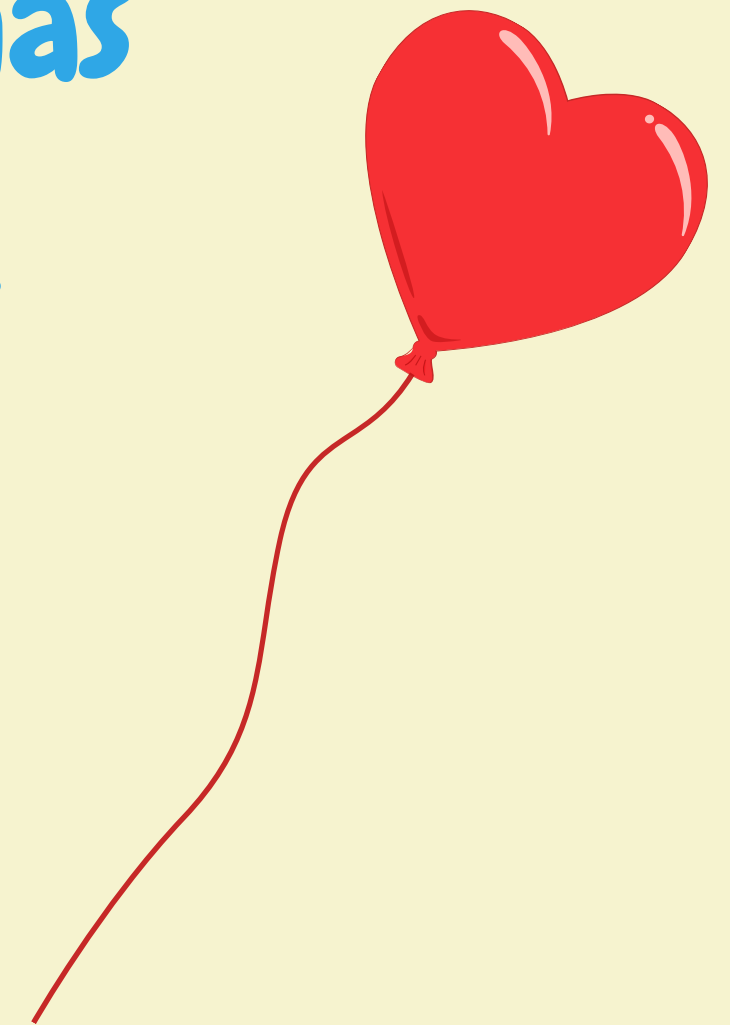

Allah is the creator of the unseen,
the heavens, angels* and jinn*.
Allah is the only one worthy of worship.

* angels: made from light and created to worship Allah.
jinn: made from smokeless fire and have free will.

Allah loves you and me.
Allah loves us more than our dearest loved ones.
We should thank Allah for all He has
given us and worship Him alone.
All praise belongs to Allah!

Questions to reflect on:

- 1. What else do you know about Allah?**
- 2. How can we worship Allah?**
- 3. Can you name the planets in the solar system? (Look back at page 3)**
- 4. Can you list some examples of Allah's creation that you can see right now?**
(Try looking out the window if you are indoors)
- 5. Allah has created our bodies. We use our bodies to think, eat and move.**
What else do you use your bodies for?
- 6. Think of 3 things you are grateful for and then say 'Alhamdulillah!'**
